GREETINGS FOR 1951

Again we extend greetings and best wishes to gardeners everywhere. May your gardens bloom like the proverbial rose, although I'm quite sure that should have been "iris." The pictures on the opposite page were taken in May, 1948, and serve well to illustrate what may be expected from our rhizomes when planted in good average garden soil—for they are one year plants grown from single rhizomes planted the year before. I believe a comparison with those shown in other catalogs will quickly convince you of the superiority of our plants. Their vigorous growth and freedom of bloom cannot be excelled.

This year we have added a number of varieties to our list and in addition, three very lovely creations of my own, which I proudly present. As modern as tomorrow—large, clean-hafted, flaring, ruffled and hardy, they should prove a distinctly worthwhile addition to any fine iris collection.

You—and your friends, are always welcome at our garden—peak bloom is usually about the middle of May and the commercial planting will be found just off North 16th Avenue, two blocks north of Fruitvale Boulevard. The new introductions and others will be found at our home at the extreme end of North 16th Avenue, or call us at 3-3935 for further directions. Thanks for past orders—and may we always justify your confidence.

Sincerely, Jack G. Linse

TERMS OF SALE

Cash with order, check, draft, or money order. Washington State residents kindly add the sales tax.

Postage prepaid on orders of \$3.00 or more. On smaller orders add 35c to cover packing and postage.

Shipment during July, August and September, orders filled in rotation as received. Kindly do not ask us to hold expensive varieties for you until late fall.

No substitutions unless second choice is given, and if stock is sold out, refund will be made promptly. We reserve the right to accept or refuse an order, or any part thereof, depending upon the amount of stock on hand, and whether at shipping time it is in good condition to be sent.

CHOOSE YOUR OWN EXTRAS

We are again continuing this popular feature. On all orders of \$5.00 or more you may select an additional 50% as extras. For \$5.00 choose \$2.50 in extras, for \$10.00 choose \$5.00 worth of extras and so on. This covers every item in our catalog, including our new introductions—with the exception of the collections on the back page, which are net, as they are already reduced in price. List your extras separately and give us a break by naming a few acceptable substitutes when ordering after mid-season—we'll treat you right.

Something to think about: This is our 5th catalog and we have yet to receive our first complaint! There must be a reason.

GUARANTEE

Our irises are State inspected, true to name, disease free and the size of our rhizomes will please the most critical. If not satisfactory in every way, return for replacement or refund. We will also gladly replace any that fail to grow if reported to us by September 30th, year of planting.

PLANTING AND CULTURE

Our Tall Bearded Irises are among the easiest of all garden plants to grow. Plant in any good, well drained soil, in full or at least half sun, two to three feet apart, covering the rhizome with about an inch of soil. Firm well, using the feet; water, and keep moist until well established. Water occasionally thereafter, if too dry, but not too late in the fall. Safe fertilizers are bone meal and well rotted compost. Others may be used with caution, keeping well away from the plants. Clumps will need dividing in perhaps three years, shortly after they have bloomed.

CANADIAN CUSTOMERS

You will find our rhizomes well acclimated to your territory, and we solicit your orders. To order, submit a list of your desired items, together with our firm name and address, to: The Plant Import Division, Department of Agriculture, Ottawa, and they will issue a permit and shipping labels which should be forwarded to us together with your order.

OUR 1951 INTRODUCTIONS

RIPPLES (Linse 1951) Early to mid-season. 36 inches. Immense blooms, 7 to 8 inches across, of a shade near Old Lilac or deeper, according to the Dictionary of Color. Haft and margin around both standards and falls delicately and smoothly blended Olive Yellow. The extremely broad, near horizontally flaring falls are rippled and waved in a most enticing manner, and the substance exceeds anything I have seen in irises. This seedling of Ormohr neither resembles the Mohrs, nor any tall bearded iris that I have seen, and is very distinct and desirable. Branching is moderate, foliage much broader and shorter than average. A hardy, healthy, good grower, and sets seeds freely. I have great hopes for its breeding possibilities. From Ormohr x Snoqualmie. Each \$15.00

SPELLBOUND (Linse 1951) Early to late. 40 to 42 inches. No one who has seen Spellbound forgets it. A beautiful thing, done in red with smoothly blended golden haft and golden overlay on both standards and falls. It positively glows! Here is an iris which seems to me to have every attribute of greatness: large size, fine ruffled horizontally flaring form, excellent habit of growth, substance and stalk, and that rarest of qualities in blends, unfading color in the hottest sun. As if that were not enough, it has in addition the delectable fragrance of Spice Pinks. A rare good one! Breeding, Tobacco Road x Prairie Sunset. Each \$20.00

WHISPERS (Linse 1951) Mid-season to late. 42 inches. A delicately colored, clean, cool iris that will win your heart. Its lovely form, delicate coloration and slender, graceful stalks all seem in keeping. My contribution to the so-called new color break of white and yellow, Whispers has ruffled standards of Chrome Yellow, and nearly horizontal falls of Amber White, gracefully upturned at the edges. Large flowers 6½ to 7 inches across, with good substance. Wide and low branching—even the branches branch! Derived from Blue Rhythm x Jasmine, this should have some most interesting breeding possibilities. Each \$15.00

SPECIAL INTRODUCTORY OFFER ON THE ABOVE NEW IRISES

Knowing that the only way to make these varieties popular is to have them seen, and that to be seen they must be in your garden, I make the following offer: The two \$15.00 introductions, a \$30.00 value, for \$25.00, and with them you may select another \$12.50 in irises from our general list as extras; or all three of the new introductions, a \$50.00 value, for \$40.00, and an additional \$20.00 worth from our general list as extras. One of a kind to the customer on the above offer please. Our prices are not inflated to take care of these discounts, and in consequence these offerings represent a genuine saving.
